

16th January 1986,

Dear Steven,

Thank you for your two recent letters with all your news.

I enclose a copy of my Bohr paper which I also gave at Pittsburgh and is to be published in a volume commemorating the 25th anniversary of founding the Center there.

Also a copy of Bohm's paper. Hendry only has a manuscript and Popper did not come at the last minute (his wife has just died and it is a very difficult time for him).

Finally I enclose a paper that is being published in the Annals of the New York Academy of Sciences, giving more thought to Shimony's "Passion-at-a-distance"

I will write again when I have worked through your two manuscripts.

With best wishes,

Yours,

Michael Redhead
